PROJECTS

AI Career Recommendation System — Repository: GitHub

Feb 2026 - May 2026

- Developed an AI-based system to recommend career paths based on user skills.
- Generated personalized learning roadmaps for users based on selected career domains.
- Implemented Machine Learning models for prediction and recommendation.

Multi-Modal-RAG-systems — Repository: GitHub

- Developed an AI-powered Multi-Model for answering user queries using Retrieval-Augmented Generation.
- Enforced document and url- ("Youtube,GitHub,Website") retrieval and context-aware response generation in Python.

Chewbe-AI-Diet-Assistant — Repository: GitHub

- Developed an AI-powered diet recommendation system that generates personalized meal plans based on user health goals and dietary preferences.
- Implemented nutrition analysis and intelligent food recommendation features to support healthy lifestyle decisions.
- Integrated Machine Learning techniques to provide customized diet suggestions and improve user engagement.
